

## Brockman STEM Club Wraps Up!

The after school computer programming STEM class is complete for this spring. The children learned a tremendous amount about logic, coding, and debugging. STEM club advisor, Dr. Rob Kosciusko, shared that his hope is that this club serves as a spark of interest for children to continue learning and developing computer programming skills. The last class involved a competition that with three winners.

The student coding project competition winner was **Zaire Ross-McCloud**. The student teacher coding project competition co-winners were **Jared Davis** and **John Grove**.

The student who wrote the most lines of code was **John Mann** with 3,872 lines of code.

Each winner received a \$25 gift card to BeBeep Toy Store.

Our student teachers did a wonderful job instructing the class: John Grove, Michael and Gabriella Kawooya, Wyatt and Mia Kosciusko, and Jared Davis.

Special thanks to Ms. Dail and Mr. Stoner for their excellent assistance in supervising this class.

This club is possible due to the generous financial support of SC ENT Allergy and Sleep Medicine!
