

The Enboard Portal

Click this link to access the portal:

<https://r1portal.richlandone.org>

Applications have been configured to be applicable to teachers and students at the elementary, middle and high school levels. *However, not all applications used at the school or district level have been added to the portal at this time.*

If you are unsure as to which applications are used in your grade level or would like additional information on instructional resources, please reference the [instructional resource guidance document](#).

1 My Applications

This tab displays the applications that have been configured to the R1 Portal. These applications are district supported resources and can be accessed at school or at home. To locate a specific application, a teacher or student can add key words to the search box to find the application.

2 My Favorites

This tab allows teachers and students to save and organize their favorite resources in one place. By right-clicking an icon anywhere it appears in the portal, users can add it to their Favorite Apps page, much like saving a website in your web browser's bookmarks folder.

3 My Links

Teachers and students can create their own icons. Users can enter a URL of their choosing or pick from a list of suggested websites, then choose a representative image to appear on the main page.

4 Explore the applications listed on the portal!
