

Lower Elementary Montessori

e-Learning Update - Week 7

Parents,

I need everyone to take a deep breath, now exhale. I'm sure you have all had times of frustration, but know you are doing your best. That's what counts!! Thank you for all your hard work. Keeping children motivated to learn is not always easy. Keep it fun. Make it a game. Find out what their interests are and use that to guide their learning. Have them create a game that shows off their newly learned skills or challenges them.

This week:

1. Week 7 packets are available in the bin near the front doors of the school. Please pick your child's packet up as soon as possible.
2. You should have dropped off completed work for weeks 1 & 2. If you have not, please get them in today or tomorrow. We have to review the work to complete our reports. Thank you.
Please seal your child's work in a large manila envelope and label it clearly with the following:
Week 1 & 2 work
Your child's first and last names
Teacher's name
Grade level
Drop-off bins will be placed outside the school in the car rider drop-off area.
3. If you have not emailed your child's weekly work plans please send them now. Today I should have weeks 1-6. You may simply take a picture of it and email that to patricia.mckevitt@richlandone.org. Weekly work plans should be emailed to me on Mondays. Week 6 work plan is due now. If you are having difficulties sending them to me please contact me and we will work something out.
4. Zoom meetings this week will be Tuesday (Lang. 2pm) and Thursday (Math 2pm). We will also have our Science Saturday Zoom meeting at 11:00. The time change is due to packing of the classroom. I will be available via Class Dojo if you need me for anything.

Please contact me if you have questions. My office hours are M-F 8:30-11:00 and 1:00-3:00. I check Class Dojo throughout the day. Please allow 24 hours to respond to emails.

Please check Class Dojo daily as I will send updates and other information to you throughout the week.

Hang in there,

Mrs. McKevitt-Johnson

You've got this!!!
