Brockman Student Showcase

BASKETBALL By: Olivia Romero

One day there was a girl who loved basketball. When she went to school, boys bullied her. The next day when she went to PE, the boys bullied her because she loved basketball. They wouldn't let her play.

The Magic Chalk By: Leah Schmidt

One day I was swinging in the park when my friend said, "let's play with the chalk!" None of us knew it was magic. We drew a giant monster! Then it came to life! It chased us all over the park until we hid in the slide. I drew rain on the slide. Suddenly, it started to rain. The rain washed away the monster. Then we were all safe!

Horses By: Beatrice Jones

Horses can be wild. But a long time ago, horses had three toes!

Under My Pillow

By: Rachel Griffin

Under my pillow I found a one hundred dollar bill! I ran downstairs and told my mom and dad. I said, "look! I found a \$100 bill and I did not even lose a tooth! I know what I'm going to use it on!" My dad and mom said at the same time, "What?" I said, "Squishees!" I am so excited! My mom said, "Are you sure you want to spend it on that stuff? Couldn't you use your money for a better cause, like a charity?" I said, "That's boring! I am going upstairs to tell my friends." Two hours later I came back downstairs for dinner. I said, "Mom, you are right, I should use the money for a good cause." The rest of the night we looked up charities we could buy food and water for. Then we found the perfect one! St Lawrence Place charity! I felt so good!

MaryBell By Liv Homewood, Shayla Peterson, and Chloe Porter

Marybell is Mrs. Anderson's new class pet. Marybell is a baby domestic bunny. We don't know exactly how old she is, but we do know she is a few weeks old. Here is Marybell's life story. Dr. Wales' (a veterinarian at Four Paws Animal Clinic) neighbor found a stray cat with a bunny in its mouth. She scared off the cat to save the bunny. Marybell got her name from Dr. Wales' neighbor, Mary Bell who saved the bunny's life. Dr. Wales examined the bunny to make sure it was healthy, but the bunny needed a home. Dr. Wales asked if we would keep the bunny and take care of her. So here we are today with a new class pet, Marybell. She is happy, healthy, and getting lots of attention.
