

Please read these instructions before beginning

1st Grade e-Learning:

Raz-Kids- Each child has a log in at www.kidsa-z.com. We have sent directions through Dojo. Raz-kids books are already on your child's independent reading level which is one below their instructional level. We recommend listening to the book first, then reading it, and then completing the comprehension questions at the end. The more books completed, the more questions answered, the more stars your child will earn to build their robot. If you do not have access to internet/computer/lpad, PLEASE find books around your house to read. We do NOT want any child falling behind.

Lexia- Each child has a log in at lexiacore5.com. They each have a password: read. We have sent information through Dojo. Lexia is a program that moves up or down levels based on how your child does. Please do NOT help them on Lexia.

Dreambox- Each child has a log information. Please see Dojo for detailed instructions. Dreambox is a program that moves up or down levels based on how your child does. Please do NOT help them on Dreambox.

e-Learning Packet- You will find at the beginning of each day, "I can" statements and learning objectives. Those were included for planning purposes. PLEASE COMPLETE the packet made by the first grade teachers. Additional lessons and resources from the district are located on <https://www.richlandone.org/Satchel%20Ford%20Elementary>. Information is forthcoming on how to "turn in" or submit completed assignments.

In an effort to save paper, we printed packets front and back. On tasks that require cutting, just simply write requirements.
